## Examiner's Reasons for Allowance

Claims 23-42 are allowed.

The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Batawi (US 5691075). Batawi discloses an oxide fuel cell comprising a separator including a first plate and a second plate. The first plate is metallic and has openings for discharging reactant gas. Batawi does not disclose "said second thin metal plate having an indented surface." Batawi discloses that the second plate is ceramic (2:29-30). Batawi discloses that the middle plate is substantially thicker than the two metal sheets and the metal sheets exert - due to their structuring- a relatively small resistance to elastic deformations parallel to the layer. Due to the middle plate having the same thermal expansion, as the electrochemically active plate, no deleterious stresses arise at the contact locations between the interconnector and the electrochemically active plate on heating up of the fuel cells to the operating temperature (2:5-25). It would not have been obvious to substitute Batawi's middle ceramic plate with a metal plate because of the thermal mismatch that would be present with the electrochemically active plate. The Examiner notes that since claim 33 recites "the electrode layer" in the body of the claim, the oxide fuel cell is interpreted as being positively recited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1745

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cynthia Lee whose telephone number is 571-272-8699. The examiner can normally be reached on Monday-Friday 8:30am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's trainer, Susy Tsang-Foster can be reached on 571-272-1293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
